Contents Volume 78

Vol. 78. No. 1

Incentive plans for productive efficiency, innovation and learning
P.J. Agrell, P. Bogetoft and J. Tind 1

Valuation of product-mix flexibility using real options
J. Bengtsson and J. Olhager 13

Assessment of quality and maturity level of R&D
P. Berg, M. Leinonen, V. Leivo and J. Pihlajamaa 29

The impact of worker differences on production system output
J.A. Buzacott 37

Risk analysis and assessment in network environments – a dyadic case study
J. Hallikas, V.-M. Virolainen and M. Tuominen 45

Total productivity measurement based on partial productivity ratios
M. Hannula 57

Analyzing productivity with the enabler-effect map
P. Lillrank, S. Holopainen and T. Paavola 69

The problem of managing product development engineers: Can the balanced scorecard be an answer?
J. Sandström and J. Toivanen 79

Representation and calculation of economic uncertainties: Intervals, fuzzy numbers, and probabilities
H. Schjaer-Jacobsen 91

Improving the reliability of the customer order fulfilment process in a product identification company
T.J. Turner, K. Mendibil, U.S. Bititci, P. Daisley and T.H.J. Breen 99

Valuing exploration and production projects by means of option pricing theory
M. Zettl 109

Diary of Events 117

Vol. 78. No. 2

Input–output models for the analysis of a local/global supply chain
V. Albino, C. Izzo and S. Kühtz 119

Transfer function analysis of forecasting induced bullwhip in supply chains
J. Dejonckheere, S.M. Disney, M.R. Lambrecht and D.R. Towill 133

PII: S0925-5273(02)00213-X

A model for supply planning under lead time uncertainty
A. Dolgui and M.-A. Ould-Louly 145

Inventory management in supply chains: A reinforcement learning approach
I. Giannoccaro and P. Pontrandolfo 153

Supply chain simulation – a tool for education, enhancement and endeavour
M. Holweg and J. Bicheno 163

Lateral coordination in a logistics outsourcing relationship
J. Huiskonen and T. Pirttilä 177

An analytic approach to production capacity allocation and supply chain design
J. Korpela, K. Kyläheiko, A. Lehmusvaara and M. Tuominen 187

Environmental control for process improvement and process efficiency in supply chain management – the case of the meat chain
G. Schiefer 197

Planning and optimization of hub-and-spoke transportation networks of cooperative third-party logistics providers
G. Zäpfel and M. Wasner 207

Diary of Events 221

Vol. 78. No. 3

An approach to the design of a manufacturing cell under economic considerations
M. Cabrera-Rios, C.A. Mount-Campbell and S.A. Irani 223

Inventory models with random yield in a random environment
A.S. Erdem and S. Özekici 239

An optimization model for refinery production scheduling
M. Göthe-Lundgren, J.T. Lundgren and J.A. Persson 255

Modelling flow and jobbing shops as a queueing network for workload control
A. Haskose, B.G. Kingsman and D. Worthington 271

Stationary optimal lengths for the plant renewal problem
E. Luciano and L. Peccati 287

Developing a new world class model for small and medium sized make-to-order companies
S. Muda and L. Hendry 295

Determining optimum Genetic Algorithm parameters for scheduling the manufacturing and assembly of complex products
P. Pongcharoen, C. Hicks, P.M. Braiden and D.J. Stewardson 311

Planning and replanning the master production schedule under demand uncertainty
O. Tang and R.W. Grubbström 323

How to release orders in order to minimise system inventory and system nervousness?
K.H. van Donselaar and B.J. Gubbels 335

Diary of Events 345
